# VISION

Our Vision is to serve our Clients in the best way by bringing inspiration and awareness of endless improvement possibilities. To be Indonesia's most trusted and innovative partner in building intelligent infrastructure, empowering businesses through technology, construction excellence, and smart solutions.

# MISSION

Our Mission is to empower our Clients with value-for-money, quality and practical business solutions and services that enable them to surpass their potential. Our offer includes providing companies as well as individuals with modern, specialised professional knowledge, products, and services.

# MILESTONE

Since our establishment in 2019, PT Standar Profesional Indonesia has consistently delivered excellence across diverse telecommunication and infrastructure projects — from MW and BTS installation to FTTH, CME, and Data Center solutions. With 100% project completion, zero major incidents, and trusted partnerships with global and national companies such as Ceragon Networks, ZTE, Fiberhome, IBST, Balitower, and SMPLUS, we continue to grow as a reliable partner in building Indonesia's digital future.

2019

2021

Seamless connectivity with 100% acceptance record.
- **CME (Civil, Mechanical & Electrical)**  
Seamless connectivity with 100% acceptance record.
- **VSAT & Transmission**  
Expanding coverage to remote areas with reliable satellite connectivity.
- **FTTH (Fiber to the Home)**  
Large-scale fiber rollout with 100+ clusters delivered.
- **Data Center Solutions**  
Supporting critical infrastructure with SCM and integration services.
- **Project Management & Permitting**  
Efficient handling of PU Nasional/City permits with full compliance.

# BUSINESS DIVISIONS

PT Standar Profesional Indonesia (SPID) has diversified its operations into multiple specialized business divisions to deliver comprehensive, innovative, and high-quality solutions across various industries.

## 1. Smart Office & Automation Systems

We provide end-to-end smart office solutions, including automation, IoT integration, and centralized control systems that enhance productivity, energy efficiency, and security for modern workplaces.

## 2. Security & Surveillance Systems

Our expertise includes designing and installing advanced CCTV and surveillance systems, access control, and monitoring infrastructure to ensure the highest safety standards for both commercial and industrial facilities.

# BUSINESS DIVISIONS

## 3. Construction & Infrastructure Division

We execute diverse construction and renovation projects, specializing in:

- Building Construction & Renovation
- Waterproofing & Structural Protection
- Road Construction (Asphalt & Concrete)
- Sewage System Construction
- Civil Works & Drainage Systems

We are officially certified under SBUJK (Sertifikat Badan Usaha Jasa Konstruksi) from the Indonesian Construction Authority, allowing SPID to undertake licensed construction and infrastructure development projects nationwide.

# BUSINESS DIVISIONS

## **4. Information Technology & Web Solutions**

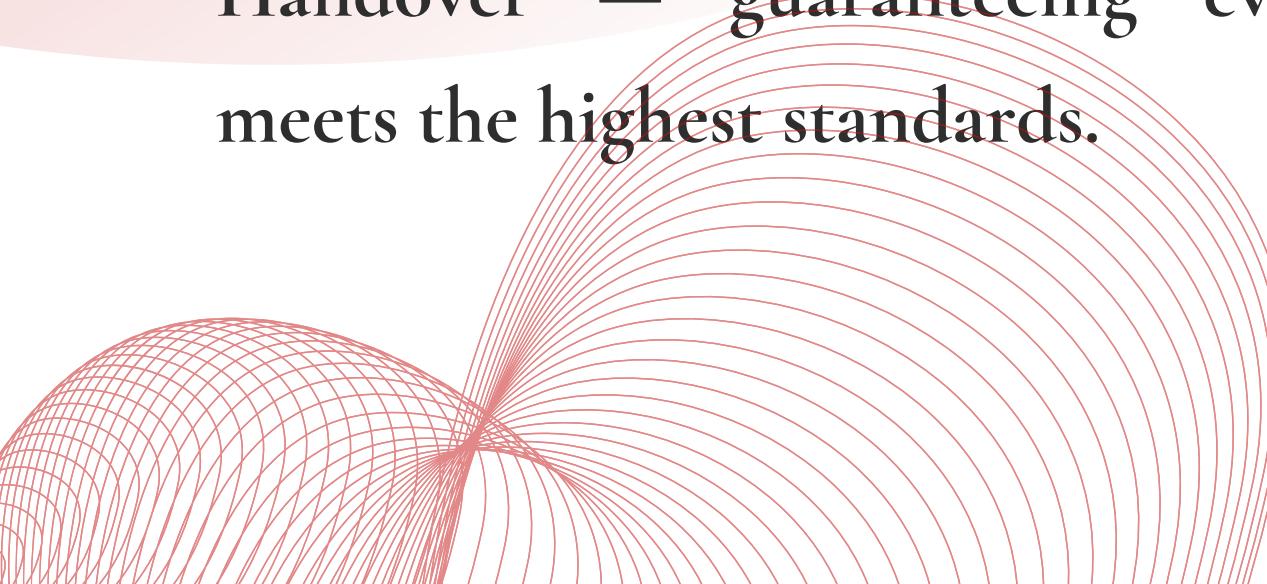

SPID offers a full range of IT services, including website design, web development, and digital system integration, tailored to enhance business visibility and operational efficiency.

## **5. Mechanical, Electrical & Air Conditioning Systems**

Our MEP division covers design, supply, installation, and maintenance of HVAC systems, Chilling Plants, and Air Conditioning solutions for commercial, industrial, and data center environments.

# THE PROCESS

At PT Standar Profesional Indonesia, we deliver excellence through a seamless process built on professionalism and precision. We begin with careful Planning & Compliance, move forward with efficient Implementation & Deployment, and ensure lasting value through strict Quality Assurance & Handover — guaranteeing every project meets the highest standards.

1

## Planning & Compliance

Careful project design, permitting, and regulatory approvals.

2

## Implementation & Deployment

Professional execution of telecom and infrastructure works.

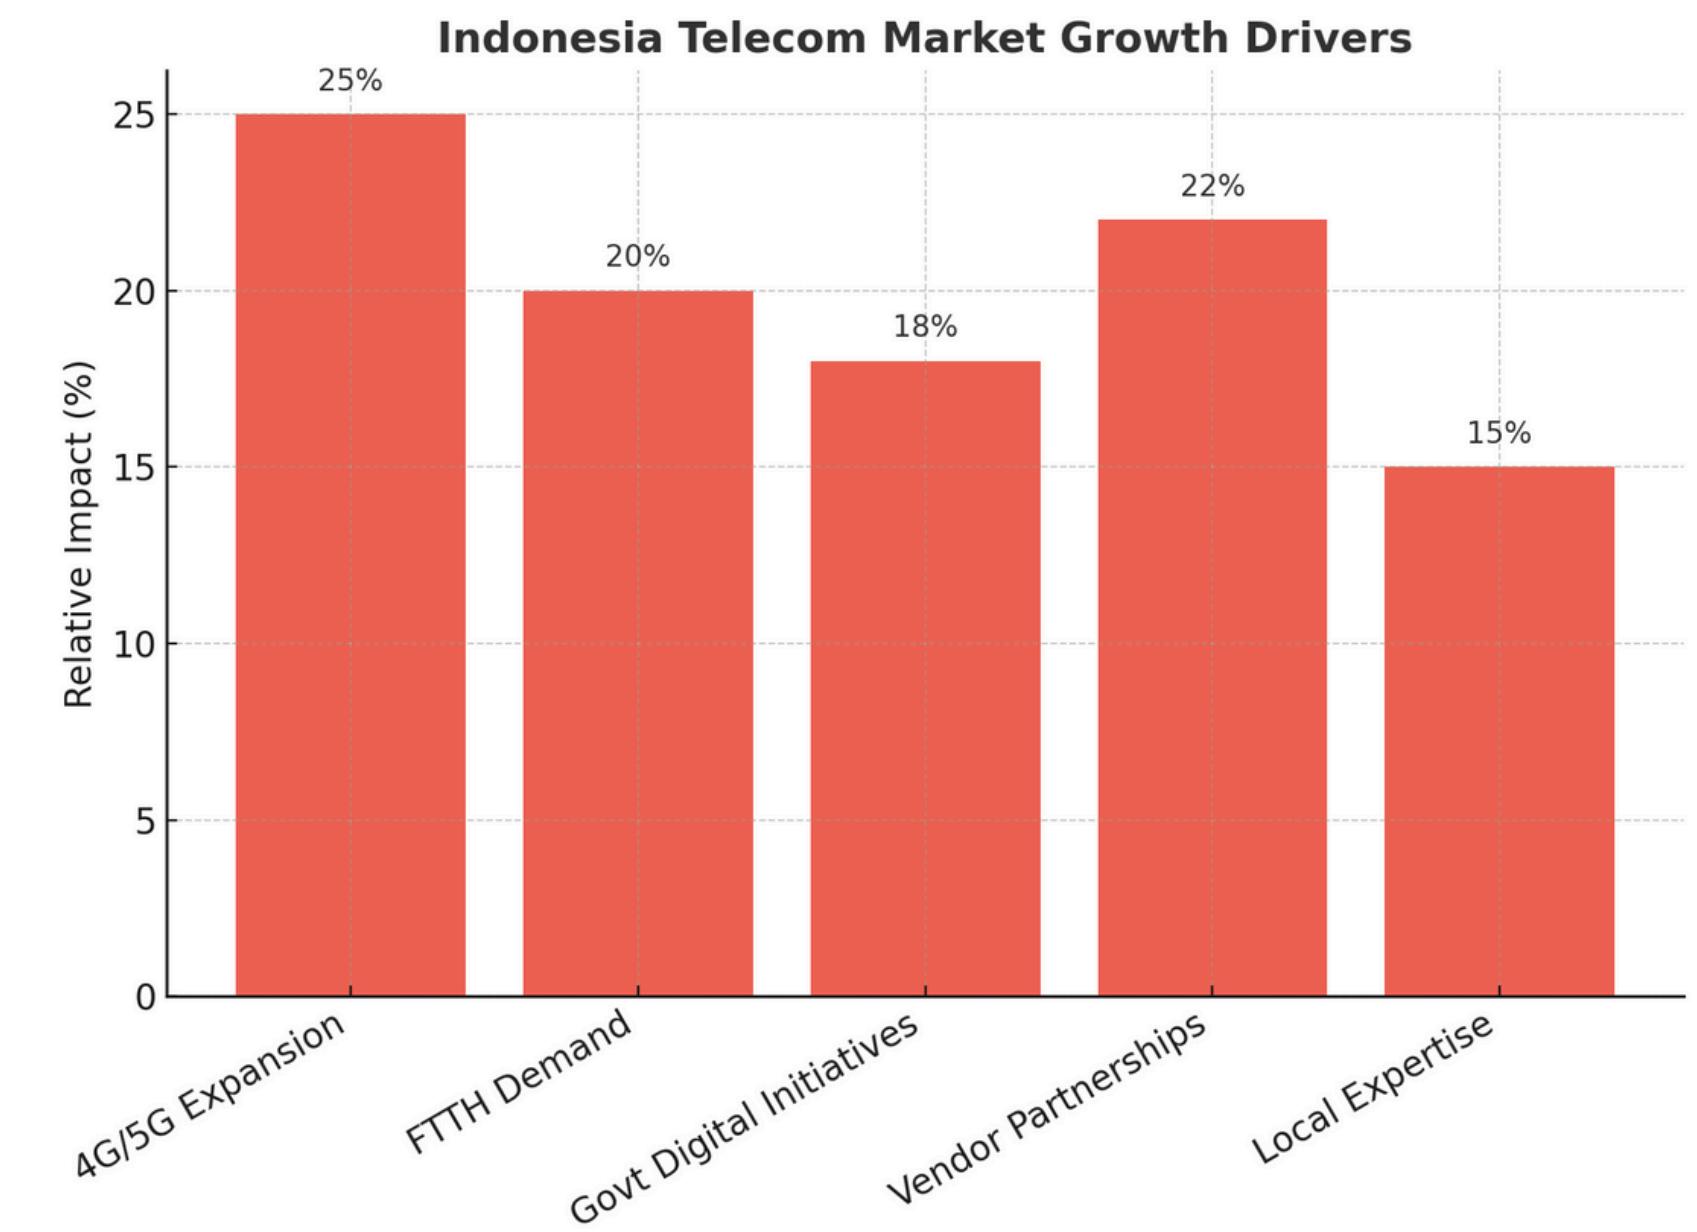

3

## Quality Assurance & Handover

Strict monitoring, zero-defect delivery, and client acceptance.

# MARKET ANALYSIS

Indonesia's telecommunication sector is growing rapidly, fueled by 4G/5G expansion, FTTH demand, and government digital initiatives. With over 275 million people and rising internet penetration, the need for reliable infrastructure is stronger than ever. Global vendors like ZTE, FiberHome, and Ceragon rely on local expertise to deliver large-scale projects. This creates opportunities for trusted partners with proven track records. PT Standar Profesional Indonesia is well-positioned to meet this demand with end-to-end telecom and infrastructure solutions.

# OUR GOALS

At PT Standar Profesional Indonesia, our goal is to become a leading and trusted partner in telecommunication and infrastructure services across Indonesia. We aim to deliver projects with the highest standards of safety, quality, and efficiency while building long-term relationships with clients and global vendors.

By continuously innovating and developing our professional team, we strive to support Indonesia's digital transformation and connect communities nationwide.

## Goals 02

To strengthen our position as a trusted partner for global and national vendors by supporting Indonesia's digital transformation.

## Goals 01

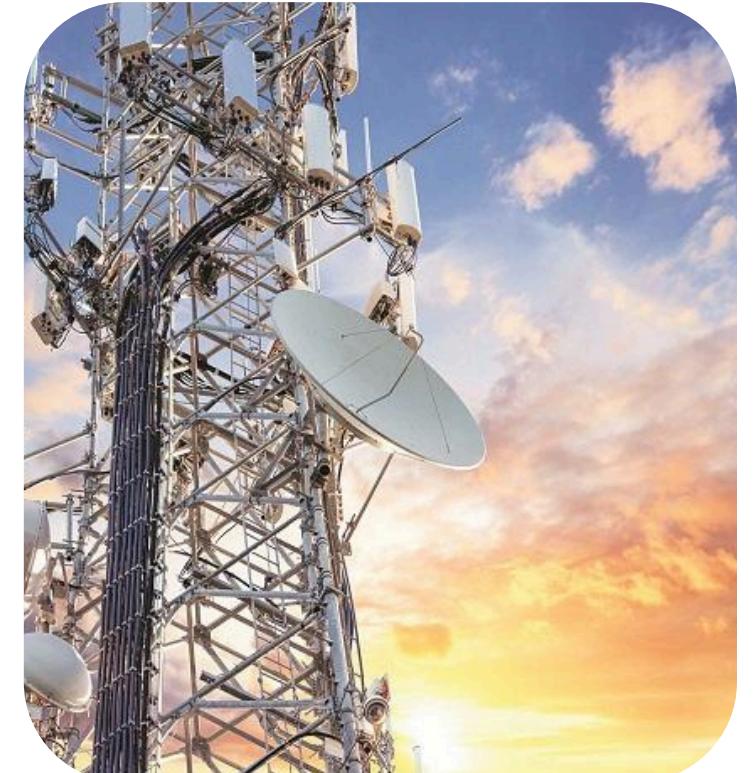

To deliver world-class telecommunication and infrastructure projects with 100% quality, safety, and client satisfaction.

# OUR PROJECT

Since 2019, PT Standar Profesional Indonesia has successfully delivered a wide range of telecommunication and infrastructure projects across Indonesia. From Microwave and BTS installation to FTTH rollouts, CME works, and Data Center support, our projects reflect professionalism, precision, and strong client trust.
